

ROUND LINEAR DIFFUSER

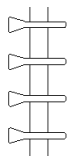

E12-R

E12-R

E12-R

DESCRIPTION

E12-R is a round linear diffuser for wall, ceiling or floor installation (in places where there is not foot access). For supply or extract air in ventilation or air conditioning installations. For use from small (offices, WC) to big areas (theatres, amphitheatres).

With fixed linear blades, for straight air discharge. Front face made by anodized aluminium. As optional electrostatic paint in RAL color and/or damper can be ordered. The diffuser is manufactured in certain sizes.

MATERIALS

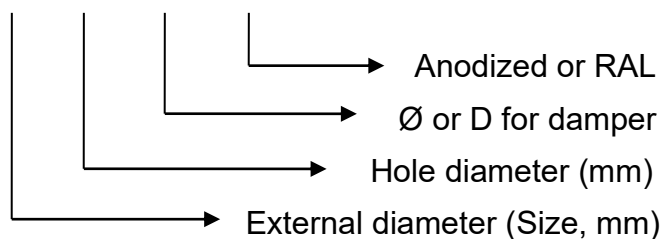

The E12-R diffuser front face is made from anodized aluminium, neck and damper are made from galvanized steel sheet. Electrostatic paint in RAL color is possible.

WAY OF FIXING

The E12-R diffuser is fixed by 2 screws between the blades.
